

## AdrenalNET (BijnierNET)

A nation-wide network set up by and for patients with adrenal gland disorders and their carers

#### For whom?

- For all patients with adrenal disorders in the Netherlands: adults, children and their parents
- For partners and carers
- For healthcare providers, particularly doctors and nurse specialists

#### Mission of AdrenalNET

To help patients, healthcare providers and scientists to enhance their knowledge of adrenal disorders with a view to helping improve the care provided

#### **Objectives**

- To ensure better (early!) diagnosis
- To improve the quality of specialised care for (chronic) adrenal disorders (co-management)
- To improve the quality of care in emergency situations (prevention of Addison crisis)

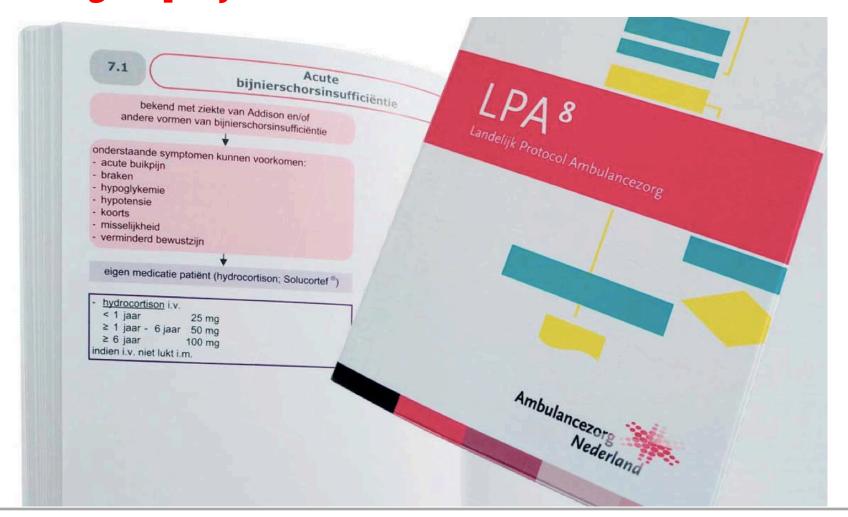

### AdrenalNET: what has already been achieved?

- National consensus on glucocorticoid stress instructions
- National arrangement with after-hours medical posts (alarm information in the triage software)
- Availability and full reimbursement of hydrocortisone, DHEA and Ketoconazole

#### National ambulance protocol

#### **Emergency injection first**

#### **European Emergency Card** (see www.adrenals.eu)

#### **European Emergency Cards**

#### Crisis kit

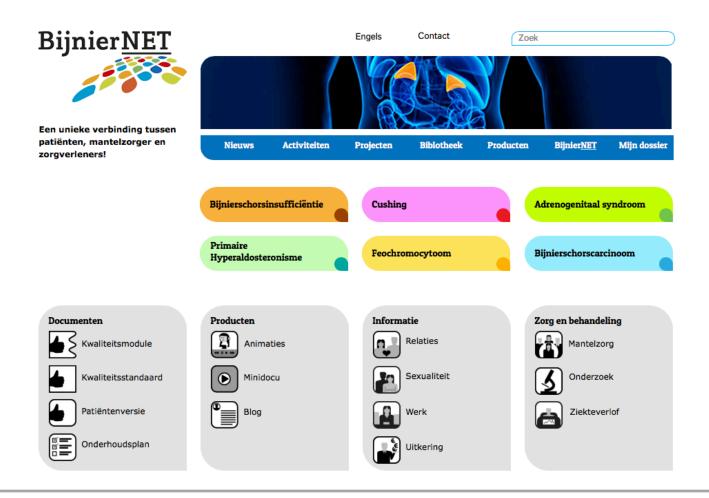

#### Safetybelt holder

#### Next step:

Development of an advanced website (www.bijnierNET.nl) that contains the latest information about diagnosis and treatment

#### Weekly blogs by experts in the field

#### Het verhaal ..... over UW bijnier – Nienke Biermasz

Geplaatst op 24 december 2015 — 2 Reacties 
Getagd met beharing, erg moe, vermoeidheid
Geplaatst in Blog, Cushing

Deze tijd van het jaar draait om het samen zijn. Samen zijn met vrienden en familie. Wij speelden onlangs een gezelschapsspel dat tot

doel had elkaar verhalen te vertellen. Geen stress, niet hoeven winnen of verliezen. Gewoon gezellig. Het onderwerp ...

#### Bijnierprobleem uit een potje, tube, spray of spuitje – Liesbeth van Rossum

Geplaatst op 16 december 2015 — 1 Reactie 

Geplaatst in Blog, Cushing

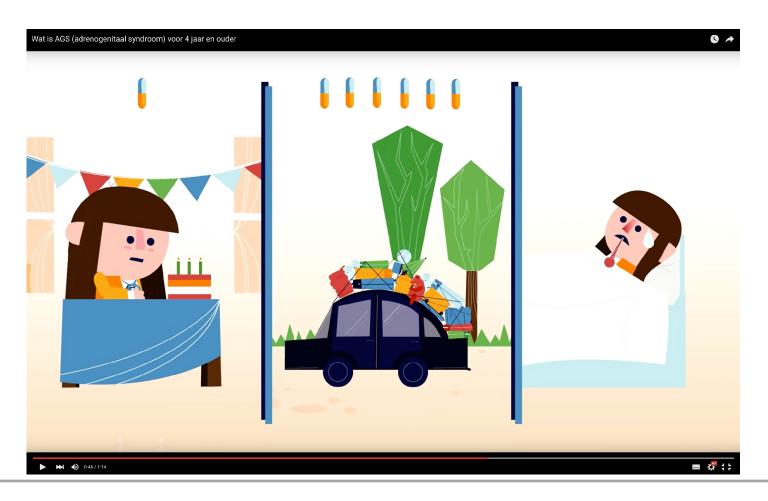

Het was een mooie lentemiddag toen op mijn spreekuur een jonge vrouw verscheen. Ze maakte een vermoeide indruk. Haar

klachten waren dat zij zich niet lekker voelde, last van spierpijnen, verminderde eetlust en aantal weken ervoor plotseling enorm in gewicht ...

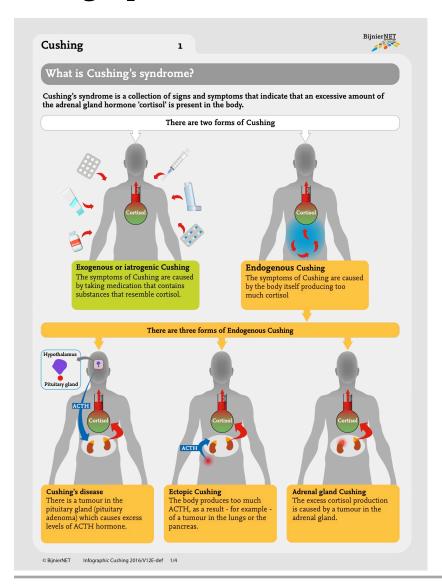

#### 9 animated clips

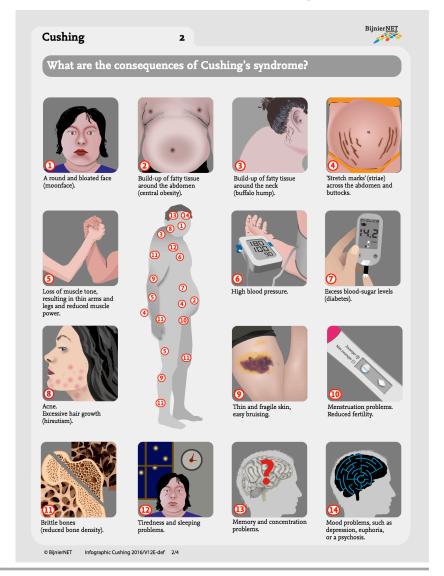

Also available in English, some in German and Danish, soon in Turkish and Arabic; see www.adrenals.eu

#### Infographics on adrenal disorders

#### Next step: Digital care

In 2016, AdrenalNET will provide the opportunity for patients to ask our team of expert health care providers questions on adrenal diseases

#### Next step: Digital care

In 2016 AdrenalNET will launch an new SOS app for assistance in preventing Addison crisis, preferably together with international partners.

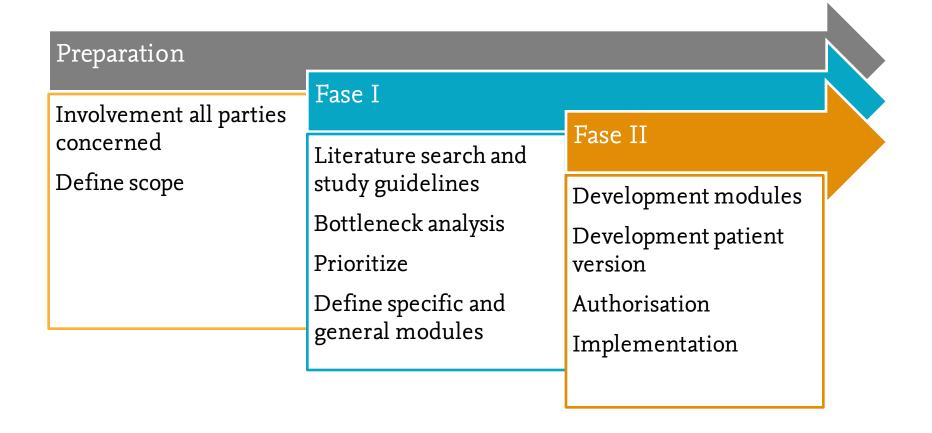

#### Next step: Care quality standard

Development of a care quality standard for all adrenal gland disorders, to ensure that patients will receive the same quality of care, no matter where they live in The Netherlands.

#### Care quality standard

#### 9 animated clips

(also available in English, some in German and Danish, soon in Turkish and Arabic; see www.adrenals.eu)

<sup>\*</sup> HPA axis = hypothalamus-pituitary-adrenal axis

Status on 15/01/2016
